|   |    |
|---|----|
| <b>Introduction</b> .....   | 1  |
| <b>Chapter 1: Introduction to Quality Management</b>                              |    |
| 1-1: Elements of a successful quality management effort.....                      | 4  |
| 1-2: Compare/contrast hospital and health plan QM activities.....                 | 7  |
| 1-3: Quality review activities of quality improvement organizations.....          | 8  |
| 1-4: Hospital quality management structure.....                                   | 8  |
| 1-5: Quality management in health information management department.....          | 12 |
| 1-6: Cancer program quality management requirements.....                          | 13 |
| 1-7: Malcolm Baldrige National Quality Award.....                                 | 16 |
| 1-8: Factors affecting health care quality and patient safety.....                | 16 |
| <b>Chapter 2: Performance Measurement</b>   |    |
| 2-1: Numerator and denominator for behavioral health performance measures.....    | 18 |
| 2-2: Types of performance measures.....   | 19 |
| 2-3: Information source for measurement data.....                                 | 20 |
| 2-4: Measures of important health information management processes.....           | 21 |
| 2-5: Identify measures of performance.....  | 23 |
| 2-6: Satisfaction survey development.....   | 24 |
| 2-7: Measuring compliance with clinical practice guidelines.....                  | 25 |
| 2-8: Locating and interpreting clinical practice guidelines.....                  | 30 |
| 2-9: Selecting clinical measures of performance.....                              | 31 |
| 2-10: Data collection for common measure of performance.....                      | 32 |
| 2-11: Risk-adjusted performance measures.....                                     | 33 |
| 2-12: Health-related quality of life measures.....                                | 33 |
| 2-13: Measures of important aspects of the medication administration process..... | 34 |
| 2-14: National Patient Safety Goals and measures.....                             | 35 |
| <b>Chapter 3: Performance Assessment</b>  |    |
| 3-1: Analyze patient outcome data.....  | 38 |
| 3-2: Tally, report, and analyze survey results.....                               | 40 |
| 3-3: Analyze hospital efficiency profile.....                                     | 42 |
| 3-4: Create run chart.....  | 43 |
| 3-5: Create Pareto diagram.....   | 44 |
| 3-6: Create bar graph.....  | 45 |
| 3-7: Create pie chart.....  | 46 |
| 3-8: Create histogram.....  | 47 |
| 3-9: Create scatter diagram.....  | 48 |
| 3-10: Create control chart.....   | 50 |
| 3-11: Identify comparative performance measurement data sources.....              | 52 |
| 3-12: Data presentation formats.....  | 53 |
| 3-13: Summarize performance measurement results.....                              | 54 |
| 3-14: Identify publicly available comparative performance data.....               | 55 |

**Chapter 4: Performance Improvement**

4-1: Create a flow chart.....58  
4-2: Identify tools used in a performance improvement project .....60  
4-3: Identify measures of the effectiveness of an improvement project .....62  
4-4: Construct a cause-and-effect diagram .....63  
4-5: Identify root cause of a sentinel event .....64  
4-6: Impact of management policies and incentives on performance improvement.....66  
4-7: Conduct a failure mode and effects analysis .....67  
4-8: Categorize patient incidents.....69  
4-9: Recognize the purpose of different types of flow charts .....72

**Chapter 5: Assuring Individual Competence**

5-1: Use occurrence screens to identify events for peer review.....74  
5-2: Using coded data to identify in-hospital complications .....80  
5-3: Create data collection and peer review forms.....81  
5-4: Identify measures of staff competence .....83

**Chapter 6: Resource Management**

6-1: Compare case management activities in a hospital and a health plan .....86  
6-2: Design clinical path variance report form .....89  
6-3: Apply utilization review criteria.....92  
6-4: Analyze utilization data.....94  
6-5: Identify data sources for an outcomes management project.....96

**Chapter 7: Risk Management**

7-1: Create patient incident reports for different audiences.....98  
7-2: Design a risk management study .....101  
7-3: Create statistical report of patient incidents.....105

**Answers to Exercises**.....106  
1-3 .....106  
1-6 .....106  
1-7 .....107  
1-8 .....107  
2-2 .....108  
2-3 .....108  
2-5 .....109  
2-6 .....109  
2-7 .....111  
2-8 .....111  
2-9 .....112  
2-10 .....112  
2-11 .....113  
2-12 .....113  
2-13 .....114  
2-14 .....114  
2-15 .....115  
3-1 .....116  
3-2 .....116  
3-3 .....117  
3-4 .....117

|                         |     |
|-------------------------|-----|
| 3-5 .....               | 118 |
| 3-6 .....               | 118 |
| 3-7 .....               | 119 |
| 3-8 .....               | 119 |
| 3-9 .....               | 120 |
| 3-10 .....              | 120 |
| 3-12 .....              | 121 |
| 3-14 .....              | 122 |
| 4-2 .....               | 125 |
| 4-3 .....               | 125 |
| 4-4 .....               | 126 |
| 4-5 .....               | 127 |
| 4-6 .....               | 128 |
| 4-7 .....               | 129 |
| 4-8 .....               | 129 |
| 4-9 .....               | 129 |
| 5-1 .....               | 130 |
| 5-2 .....               | 130 |
| 5-3 .....               | 131 |
| 5-4 .....               | 133 |
| 6-2 .....               | 134 |
| 6-3 .....               | 135 |
| 6-4 .....               | 135 |
| 6-5 .....               | 136 |
| 7-1 .....               | 136 |
| 7-2 .....               | 141 |
| 7-3 .....               | 142 |
| <b>Test Items</b> ..... | 142 |
| Answer Key .....        | 157 |
