

TABLE OF CONTENTS

Chapter 1: Comparative Data are Here to Stay	1
Report Card or Performance Report – What’s the Difference?	3
How this Book Will Help	4
Chapter 2: Exploration	7
Selecting Comparative Data Sources.....	12
External Requirements.....	15
Clinical Importance.....	17
Strategic Performance Management Priorities	17
Available Resources	19
Reporting Techniques and Analytic Tools	20
Results reported individually	21
Results compared to average performance	22
Actual versus expected performance	27
Results compared to a benchmark or goal	29
Results reported in control charts	31
Results reported according to a ranking system	35
Choosing Comparative Measurement Opportunities.....	36
Select Measurement Systems.....	37
Special Purpose Comparative Data.....	40
Chapter 3: Assessment	43
Data Analysis in Three Steps.....	45
Step 1: Verify the Accuracy of Your Data	46
Step 2: Acquaint Yourself with the Comparison Group.....	47
Step 3: Uncover the Story in the Data	55
Difference between your rate and the comparison group	59
Amount and type of variation in trends reports	64
Gap between your performance rate and internal expectations	69

Chapter 4: Intervention	75
Be Prepared with Answers.....	76
Anticipate Reactions and Prepare Accordingly	83
Dig Deeper to Find Improvement Opportunities	85
FADE Case Study	87
From Analysis to Intervention	96
Gather Additional Information	99
Discover “Best Practices”	102
Select the Best Interventions.....	105
Change Can Create Resistance	107
Test Proposed Changes	109
Chapter 5: Monitor and Maintain	113
Select Measures	113
Monitor Performance.....	115
How Long Should Monitoring Continue?	116
Next Steps	119
Transfer Knowledge.....	121
In Closing.....	122
Facilitate Positive Change	123

LIST OF FIGURES AND TABLES

Figures

1.1	Steps involved in using comparative data to improve health care performance.....	5
2.1	Measurement data presented individually	21
2.2	Example of comparative report	22
2.3	A Quality Indicator Project [®] comparison chart with facility rate, group's weighted mean, and range of expected performance	23
2.4	Incidence of increase in pressure ulcers on discharge from home health.....	24
2.5	Comparative report using percentile rankings.....	25
2.6	Sample case mix report for home health agency based on OASIS data submitted to the Medicare Program	26
2.7	Comparison of Virginia cardiology mortality versus the national norms.....	28
2.8	PsychSentinel report showing length of stay versus outcomes	29
2.9	OR Benchmarks report of surgical supply cost comparisons	30
2.10	X-bar control chart of surgical wound infection rates	32
2.11	Control chart selection guide.....	33
2.12	Matrix for rating the value of performance measures.....	36
2.13	Urinary catheter-associated urinary tract infection rate for patients in ICU.....	40
3.1	Steps of data analysis.....	45
3.2	P-Chart for 1996 VBAC rates at southwest Michigan hospitals, all levels	49
3.3	P-Chart for 1996 VBAC rates at southwest Michigan hospitals, stratified	50
3.4	Example of a Quality Indicator Project [®] custom report	53
3.5	Comparison of functional outcomes during inpatient episode of care	56
3.6	Distribution of anesthesia costs per case for total knee replacements	57
3.7	Mean pain ratings reported by patients four hours after surgery	59
3.8	Theoretical normal distribution	60
3.9	Theoretical normal distribution with standard deviations	61
3.10	Comparison chart showing confidence intervals, comparison group means, and facility means.....	62
3.11	Comparison chart of medication error rates	63
3.12	<i>c</i> chart of patient falls in an inpatient rehabilitation facility	64
3.13	Nosocomial infection rates at a skilled nursing facility compared to peer group.....	67
3.14	<i>p</i> chart of skilled nursing facility nosocomial infection rates.....	68
3.15	Performance goal: reduce variation	72
4.1	X-bar control chart of mean times for laboratory test processing	80
4.2	Run chart showing a disturbing upward trend.....	81
4.3	Nosocomial infection rates at a skilled nursing facility compared to peer group.....	82
4.4	Quality manager's comparative data presentation preparation worksheet	84
4.5	Histogram showing death rate by attending obstetrician.....	87
4.6	Histogram showing death rate by attending pediatrician.....	88
4.7	Flowchart of steps in ordering and administering corticosteroids.....	92

4.8	Rate of steroid use by physician	93
4.9	Action planning decision tool.....	94
4.10	Cause-and-effect diagram.....	97
4.11	Flow chart: Factors affecting surgical wound infections.....	98
4.12	Illustration of spreadsheet showing patient-level data from the Quality Indicator Project [®]	101
4.13	Common barriers to clinical process improvement: knowledge, attitudes and behavior	107
4.14	Questions to consider during pilot testing of proposed actions	110
5.1	Control chart showing the impact of actions designed to reduce wait times in the emergency department.....	115
5.2	Steps in using comparative data to improve health care performance.....	122

Tables

2.1	Examples of AHRQ inpatient quality indicators for surgery services	9
2.2	Examples of Medicare skilled nursing facility performance measures	10
2.3	Common comparative performance projects affecting health care providers	15
2.4	Estimated cost of data collection using different survey techniques	20
4.1	Breakdown of neonatal death rates by mode of delivery.....	89
4.2	Comparison of lethal congenital anomaly rates.....	89
4.3	Comparison of fetal distress rates.....	89
4.4	Comparison of chorioamnionitis rates.....	90
4.5	Comparison of neonatal death rate causes.....	90
4.6	Relationship between surfactant use and neonatal deaths	90
4.7	Administration of corticosteroids	91
4.8	Timing of corticosteroid administration	91
4.9	Incidence of suboptimal doses of steroids	92
4.10	Performance data following implementation of action plans	95
4.11	Results of the Guidelines Applied in Practice Initiative (2002)	106
